

Automatic & single raschel bags

About us

As the problem of inefficient food production is increasingly evident and the demand is increasing, solving this burning problem is crucial to the future of us all.

The vision of Gerovit is based on this idea. With direct contact with the producers, we constantly listen to their needs and problems in the processes of production, protection, and storage of food.

Our team is made up of people whose joint passion for solving this problem with expertise and experience, as well as the latest generation of equipment, guarantee an effective overcoming of every present and future problem.

With us, the future is safe.

Company in details

The production facilities of the company are located in the city of Arandjelovac, SERBIA. We are a 100+ employees company with a production facility present in Serbia from where we cover markets of EU, Russia, North Africa, South Africa, and the Middle East with a tendency towards further growth of the market. We are focused on fast production and fast logistic.

In 2019 our company get certificated at TÜV SÜD for Quality Management System (QMS) ISO 9001:2015 environmental management system (EMS) ISO 14001:2015 and Occupational Health and Safety Management Systems (OHS) ISO 45001:2018.

Using machines and tools from known manufacturers, such as Reifenhäuser, T.H.E. (Thomas Machines), Arburg, Macchi, Karl Mayer, NGR and others provides the latest processing technology.

For maximum satisfaction of customer needs, the Company is constantly innovating and improving personnel and equipment. Since the beginning, the Company introduced the SAP ERP modules MM, SD, PP, FI CO. World-renowned manufacturers and our suppliers, DOW, EXXONMOBIL, BASEL, SABIC, PLASTICA KRITIS, CABOT, MOL, UNIPETROL, VERSALIS, AMPACET, PETROHEMIJA, S-GROUP, and other guarantees that the raw materials that are used in the production process are of superior and reliable quality.

We are processing 6.000 Tones of PE material per year in a wide range of more than 300 products.

Automatic & single raschel bags

Millions of tons of different products find their way to customers all over the world in raschel bags - for farmers, food producers, or whole sellers – one of the most recognizable packaging types in the world.

The blown film line of the Italian manufacturer Macchi provides HDPE foil with the orientation of the molecules in the machine direction which represents a quality raw material for our German made Karl Mayer knitting machines. By using high-quality materials from Dow Chemical, we provide a high level of quality for our raschel bags.

Gerovit Raschel bags are available in different colors and sizes which can be a great way to promote your product.

They can be combined with your labels and other marketing material that will make your bags unique and more noticeable.

We use only materials that have food contact approvals and as such, they are safe for packing food and products for children such as toys. Materials used for our bags are 100% recyclable and our bags do not contain heavy metals. They are manufactured using the latest technology that emits no toxic gases.

Gerovit Raschel bags are a cost-effective and efficient solution for packing different products. They are simple to use and save space. Their air-permeable netting secures ventilation that reduces the moisture within the bag, guarantees the freshness, and prevents mildew and rotting of products. This is why Raschel bags are ideal for packing fresh fruits and vegetables: potatoes, onion, leek, citruses, cabbage, corn, carrots, etc. Additionally, they may be used for packing toys, firewood, pet food, and other retail products.

Fine, mesh-like structure guarantees visibility of the quality of your product. Carefully chosen colors and nuances serve to improve the look of your product in order to make it look even better.

Millions of tons of different products find their way to satisfied customers daily and globally in raschel bags - for farmers, food producers, or whole sellers.

Environmentally Safe

Materials used for our bags are 100% recyclable. Our bags do not contain heavy metals. They are produced using the latest technology and not releasing toxic gases when they are cut with hot wire.

Single bags & automatic bags on rolls

Single bags for manual and semi-automatic packaging. Available with closing rope. Supplied in balls of 1000-2000pcs.

Bags on rolls are suitable for automatic packaging that requires uniformity in bag size, weight, and dimensions.

Single bags for manual packaging

Double bottom

High payload tape

Bags on rolls for automatic packaging

- A - Machine marker
- B - Bag height
- C - Bag width
- D - Bag spacing
